KIMS
TRUST HOSPITAL

Put your life in Trusted hands

KIMS

TRUST HOSPITAL

Welcome to Trust Hospital Health care has always been a priority in life for modern day society yet we still find areas in rural India where availability of modern medicines and adequate medical facilities are scarce.

With the establishment of Trust Hospital, we intend to elevate the standards of medical facilities and health care in the rural regions. We aspire to deliver optimum quality service by providing modern infrastructure, sophisticated equipment, qualified and dedicated medical personnel and staff and much more at prices that could be afforded by everyone.

Vision & Mission

"State-Of-The-Art Health Care For all" To provide the highest quality medical facilities and health care at lowest possible expense. To dedicate our wholehearted attention and utmost care to all the patients and strive hard for their well being and absolute satisfaction.

Put your life in Trusted hands

Welcome to KIMS

Welcome to the unique convenience of hospitality and care with highly qualified group of physicians and state-of-art facilities.

Departments

Internal Medicine and Geriatrics

An active group of board certified nursing practitioners that specialize in geriatrics, physical medicine, rehabilitation, and general internal medical services. Our services are stressed on caring for post-acute, and long-term care patients. The specialized service delivery is designed as the leading patient care model for today's geriatric, and chronically ill patient.

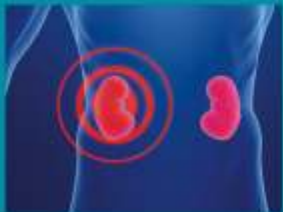

Gynaecology

The Gynaecology department provides advanced diagnostic and treatments modalities in a caring environment for women throughout all periods of life. Our specialized medical team provides advanced maternity services for normal and complicative pregnancies, postpartum, family planning services, infertility screening and treatments. We undertake all endoscopic gynaecological operations in addition to conventional gynaecology surgeries and medical therapies.

Pediatrics

The General Pediatrics division gives detailed primary well-child and ill-child care as well as consultation. Pediatrics is carried by well equipped modern biochemical, metabolic, pathological, and radiological labs, staffed with experienced personnel capable of diagnosing. The General Pediatrics department also works added with the Pediatric Cardiac Services department for children's cardiological conditions.

Urology

The Department provides skilled and advanced facilities for the diagnosis and treatment of genitourinary problems in adults and children. A highly qualified and experienced team of dedicated urologists and resident surgeons are available 24 hours a day. The latest state-of-the-art technology and equipment are available. The faculty sub-specialises in the fields of Paediatric Urology, Uro-oncology, Laparoscopic Urology, Andrology, Female Urology, Neuro-urology and Reconstructive Urology.

E.N.T

The Department of ENT provides you an affordable and complete care with issues related to ear, nose and throat concerns. We providing a wide range of services at an affordable cost, along with both basic and specialized treatments in the discipline.

Nephrology

The Department of Nephrology offering maximum health care for patients with different types of renal (kidney) diseases. Acute and chronic renal diseases caused by diabetes mellitus, hypertension, stone disease, infections, hereditary illness and poisons are diagnosed and managed.

Cardiology

The cardiology team provides advanced treatments to patients with a variety of cardiovascular disorders. For an immediate response, a 24 hours emergency team with a mobile intensive care unit provides speedy access in emergencies. The department is fully equipped to provide intensive and multi disciplinary, comprehensive medical care for patients with complex, multiple disorders.

Neurology

KIMS' Neurology Department works towards the management of acute neurological conditions such as stroke, meningitis, Guillain-Barre syndrome, status epilepticus and myaesthesia gravis. The Department manned by experienced neurologists and neurosurgeons. The department prouds extensive Intensive Care facilities so vital in providing quality neurological healthcare.

Ophthalmology

The Department of Ophthalmology provides well equipped facility for the complete examination, diagnosis, and treatment (both medically and surgically) of all ocular diseases in both adult and pediatric patients.

The department is comprised of a dedicated and well-qualified team of eyecare professionals with excellent support from nursing and administrative staff. Eye disorders can be diagnosed and treated at KIMS, including cataract, glaucoma, strabismus and amblyopia, ocular trauma, refractive disorders, cornea and external diseases, lachrymal drainage disorders, oval diseases, and retinal disorders.
